"We tried other products, but they didn't work."

Wythop Hall Crossing Leicesters and Swaledale

"We were getting some barren ewes and the lambs weren't growing as well as they could. Since using Liquithrive Sheep® we now have less barrens and lambs are growing a lot better."

Robert Emmott, Wythop Hall, Cumbria

Cumbrian sheep farmer Robert Emmott has been using Liquithrive Sheep® for the last 10 years and says he has seen improved flock performance. Farming in the heart of the Lake District, Robert knows he has trace element deficiencies on the farm, which is why he uses the product.

Liquithrive Sheep® is a chelated trace mineral product and provides a highly available source of these important nutrients, enhancing absorption and effectiveness.

HAY & BRECON FARMERS

Introduction to HBF Ruminant Coarse Mix Range

At Castle Feeds, we manufacture all our feeds according to strict quality controls and rigorous feed safety codes. Our coarse mixtures are manufactured in our UFAS approved mill with our team of highly qualified and dedicated specialists constantly monitoring production and packaging of the entire range.

UFAS (Universal Feed Assurance Scheme) is a feed assurance scheme run by the Agricultural Industries Confederation. Designed to help achieve 'safe feed' for both the feed and food supply chains, it was set up to ensure complete traceability of feedstuffs, from harvesting of ingredients and manufacture through storage, packaging, loading, transport and delivery.

Manufacturing under the umbrella of UFAS approval provides you with assurance that Castle

Feeds are produced to most stringent quality and safety standards. All appropriate standards have been adhered to and our expert team has the systems in place to ensure full compliance, with every batch of our feed is manufactured to the highest possible standards.

Darryl, Production Manager (Far Right) and the production team at Hay On Wye.

XP Gold Ram Mix

Our flagship ram mix designed primarily for pedigree ram breeders but also suitable for commercial rams flocks.

To be fed with roughage; fresh water must be freely available. Contains Ammonium Chloride which aids in helping reduce the possibility of urinary calculi.

Oil	3.3%
Protein	18.2%
Fibre	8.9%
Ash	8.0%

Ingredients

Hi Pro Soya (GM), Grass Nuts, Micronized Peas, Wheatfeed, , Micronized Barley, Rolled Barley, Rolled Oats, Molasses, Sunflower, Micronized Maize, Linseed Expeller, Ruminant Vitamin and minerals, UK Distillers, Full Fat Soya(GM) and Diamond V XP Yeast, Ammonium Chloride.

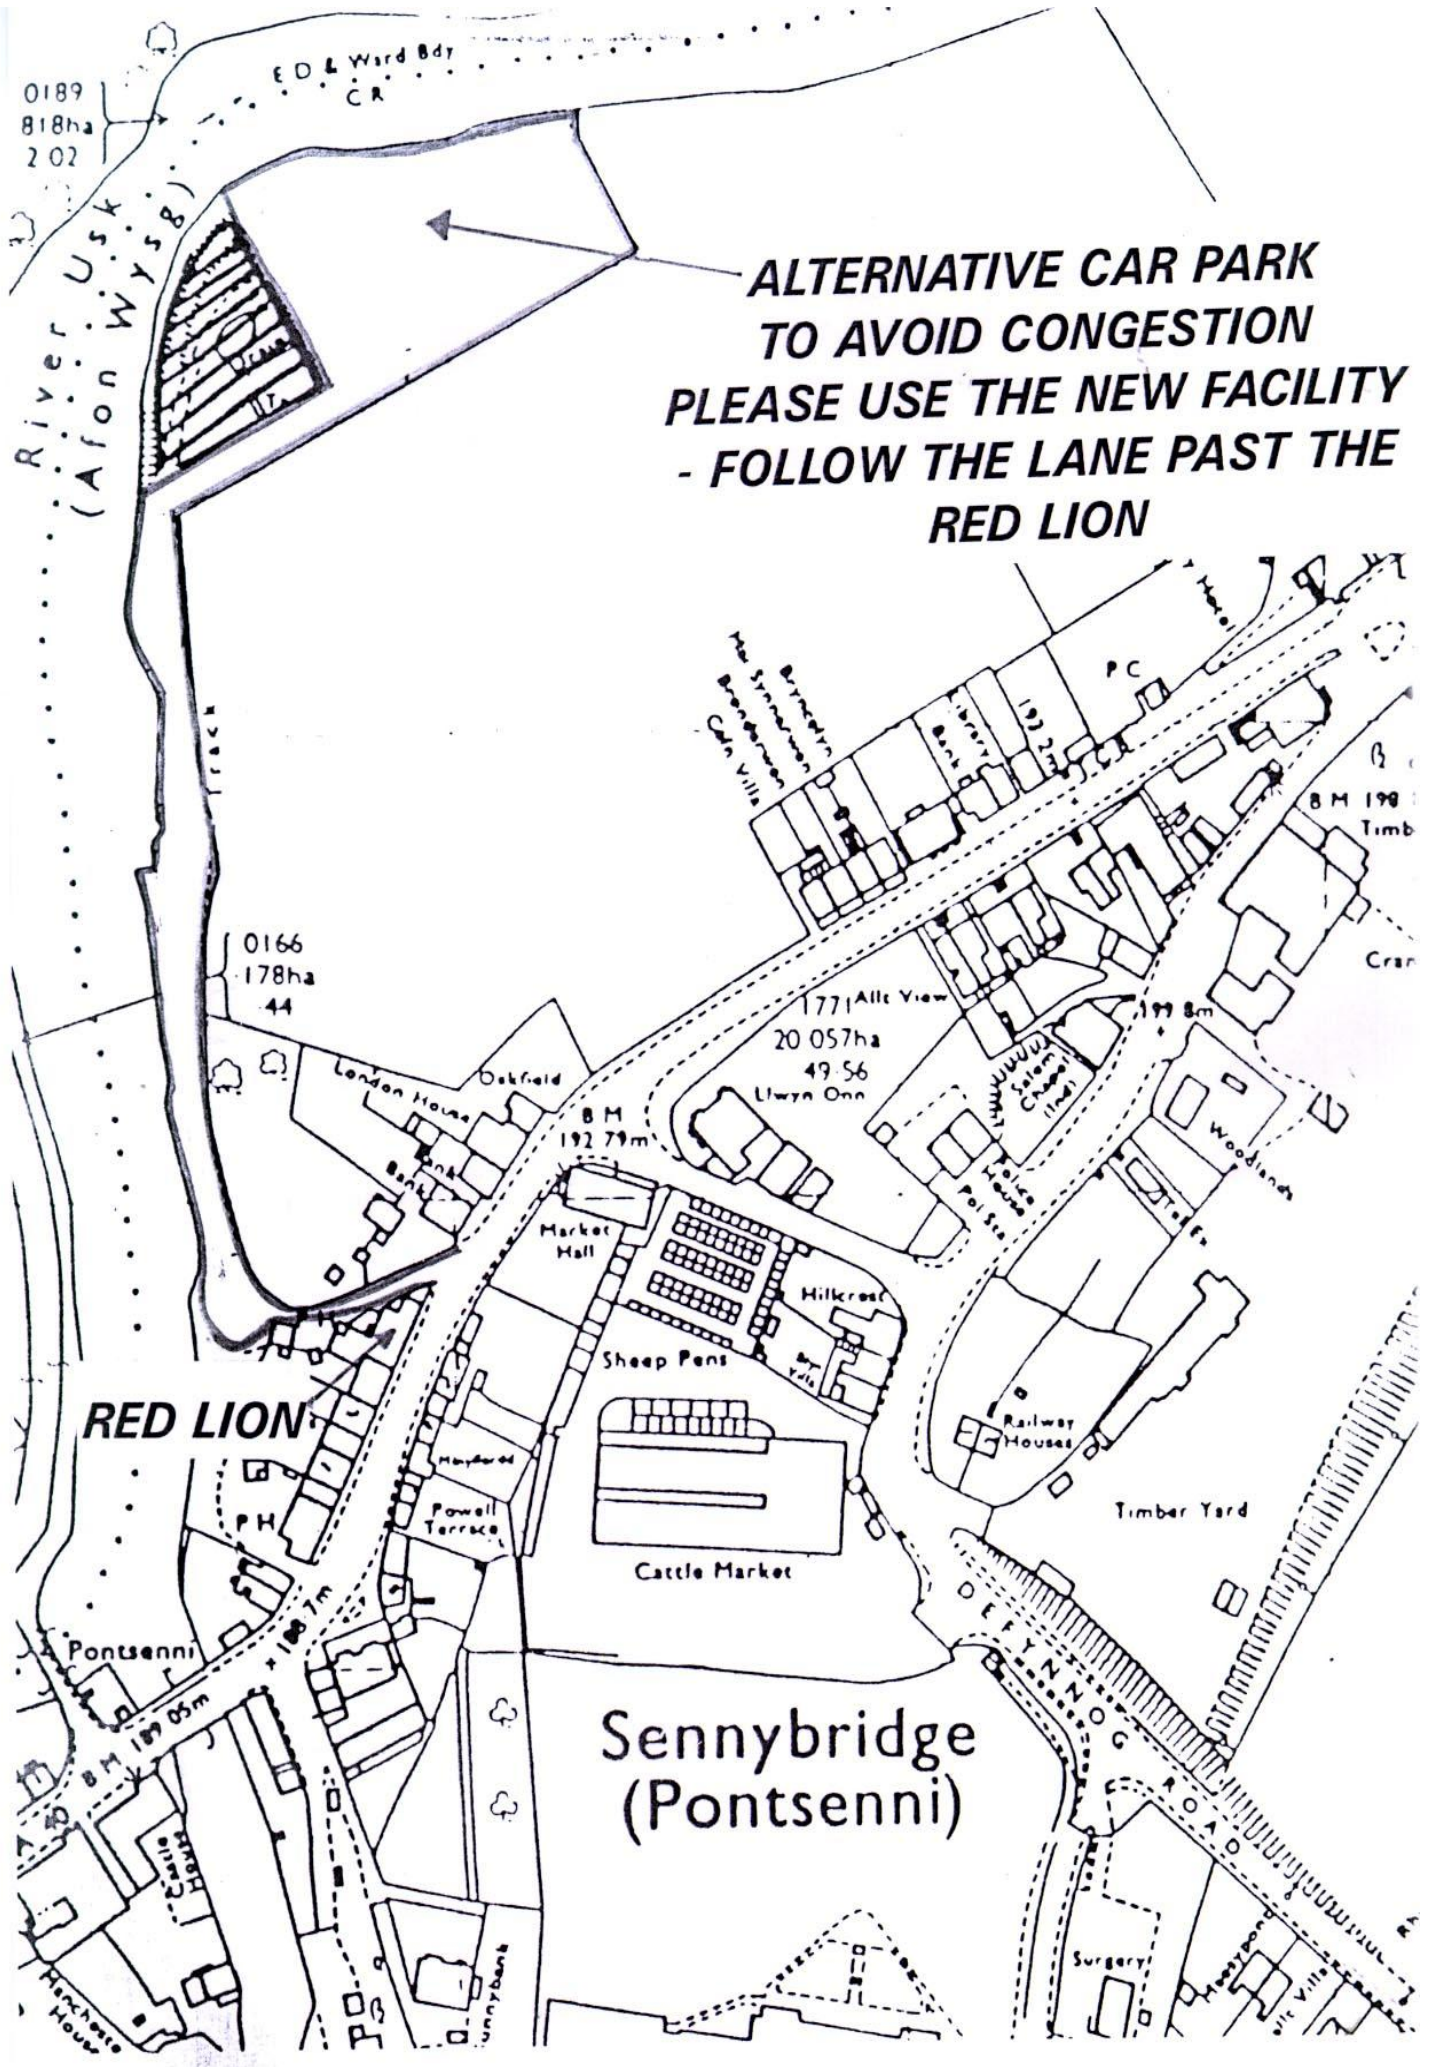

Contains **micronized raw materials** which enhances the palatability, digestibility and nutrient value of the product. The micronizing process optimises protein solubility and allows more efficient digestibility of the energy, which is particularly suited in a young developing animal but will also benefit growing and older sheep in improved growth, production and feed efficiency.

Rolled and micronized cereals providing a good source of fermentable energy together with digestible fibre from grass nuts, sunflower and wheatfeed.

Cooked linseed is an excellent source of slow release energy, rich in Omega 3, 6 and 9 fatty acids and high in anti-oxidants. A good source of quality protein and Zinc. Linseed will tend to aid "bloom" to the animal.

XP Yeast promotes the well-being of the animal, particularly if the animals are bought in, where the stress of markets and transport can reduce immunity. XP yeast helps stabilise rumen pH, improves feed digestibility and animal performance.
